

Nordia BY FREDRIK TORSTEINSEN, MNIL

Nordia is inspired by wooden furniture in the 50's and 60's. The collection is comprehensive, light and easy to furnish. The reclining chair and sitting group area can be combined where users have different functional needs.

Universal design reflects the Nordic ideals for social responsibility and care. Nordia is suitable for all users and fits well also for people with reduced mobility. Height is adapted to users with reduced strength. Armrests provide good grip, even for people with reduced arm strength. The footrest raises in sync with a regulating back, and may be withdrawn for easy access to the recliner. The reclining back is stepless. Covers are removable.

At Helland, we believe that all people deserve furniture with good design and smart functions.

Furniture that cares

NEWS 2018

Svea DESIGN NINA JOBS | STINA SANDWALL

The future elderly generation has new demands on care. Making individual choices, being able to choose their own lifestyle and consume thereafter, and wanting to keep their lifestyle as they grow older.

With Svea, we have developed a furniture range for everyday use with a contemporary expression. In Svea, softer shapes meet the practical features. Measurements and material choices meets requirements in an elderly care environment.

- Svea is soft and embracing
- Contemporary and young at heart
- Design for the modern elderly
- We have worked with soft curves and high seating comfort
- Stackable and possible to hang on tables, for instance the accompanying Ark tables

The chair fits both the public and private homes.

AXO BY HELGE TARALDSEN, MNIL

The combination of wood and soft lines in the seat / back gives AXO a complete design. Visually, the AXO also seems safe and harmonious.
